

REMARKS

Claims 25-48 are pending in this application. By this Preliminary Amendment, claims 1-24 have been cancelled, claims 25-48 have been added, and the Abstract has been replaced.

Prompt and favorable examination on the merits is respectfully requested.

Respectfully submitted,

PILLSBURY WINTHROP LLP

APPENDIX

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

Claims 1-24 are cancelled.

Claims 25-48 are added as new claims.

IN THE ABSTRACT:

The Abstract is changed as follows:

ABSTRACT OF THE DISCLOSURE

A device for guiding a continuous strip [(S)] past a marking unit, which is arranged to non-mechanically provide markings on at least one strip surface, [comprises] includes a longitudinal channel [(220)] for receiving the strip [(S)]. The channel [(220)] is at least partly defined by guiding elements [(222, 222')] which] that are arranged for abutment against the strip [(S)] from opposite sides of the channel [(220)]. At least one of the guiding elements [(222, 222')] is displaceable and biased towards the channel [(220)]. In this device, the strip can be positioned with high-precision without being subjected to excessive frictional forces during the marking operation, to minimize any interference with the motion of the strip.
